DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to an apparatus for forming a bathtub liner, classified in class 425, subclass 405.1.
 - II. Claims 14-26, drawn to a method of forming a bathtub liner, classified in class 156, subclass 94.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the product can be made by another and materially different apparatus such as an apparatus without a seal associated with the cavity as claimed. Also, the apparatus can be used for making a different product, such as a container liner.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Jody L. Factor on November 6, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1733

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
